

CHEAPER | BETTER | FASTER

WanTok Press Release @ Wed March 26, 2014

Headline: WanTok Launching April 1

Great news for Vanuatu as WanTok get set to launch their new 4G services in Port Vila on April 1.

WanTok is the newest player in the local ISP (Internet Service Provider) arena. And what will surely be Vanuatu's Fastest Internet.

What was formerly known as Can'l is now WANTOK NETWORK LIMITED, a locally owned Vanuatu company with plans to expand its services to all of Melanesia. In turn creating our very own Melanesian Network.

What is WanTok? In Tok Pisin it means 'Someone who speaks my language'. But in technical terms it's a state of the art 4G wireless network that's just been set up in the greater Port Vila area. We all remember 2G - then 3G and now there's 4G, the new standard in cellular communications and up to 5 times faster than 3G.

In Vanuatu we operate under the 4G LTE system - which stands for Long Term Evolution. The network is then connected straight to the new undersea cable via fibre optics.

For someone to access this network they will need a 4G compatible device such as a smart phone or tablet but we'll also be providing both indoor and outdoor units that you can use in your home or office.

Our speeds will be the fastest in Vanuatu in terms of wireless connectivity. Up to 20mpbs. What does that mean? FAST FAST FAST. Streaming Video, Streaming Music, Fast movie Downloads, file transfers, talking to your friends on Skype with video actually switched on. And these speeds are as good if not better than people are getting in Australia at comparable prices. Vanuatu is now in the 21st Century!!!

And because we're 4G our network doesn't get crowded and start slowing down like the existing WiFi and 3g networks. Meaning you get more consistent speeds.

It's going to be great for businesses who can now send large files fast and able to confidently use VoIP Technologies. If you don't know anything about VoIP then you soon will. It allows you to make phone calls over the internet at a fraction of the cost of your traditional telephony providers.

We officially go live on April 1 and our full price list will be revealed over this coming weekend.

You'll be pleasantly surprised and why our slogan is Cheaper - Better - Faster

Best price, Best Value, Best Speed.

We're also opening an Experience Centre across the street from the Anchor Inn where you can come in and see for yourself what 4G is all about and talk to our friendly staff about a package that's right for you.

WanTok is currently rolling out in the Port Vila area but we're constantly putting in new towers with plans to expand into other parts of Vanuatu so stay tuned.
